

# Guide to setup and configure for TestCaseCreator application

## 1 For the spreadsheet owner

### 1.1 Enable Google Sheet API and create credentials.json

Please follow the link:

<https://developers.google.com/sheets/api/quickstart/python>

## 2 For the user

### 2.1 Python installation

In order to run the application, python version 3.10 or above is needed.

For Windows: Open Microsoft Store -> type in Python -> choose your preferred version -> click Get.

### 2.2 Install the Google client library

open CMD and run this command:

```
pip install --upgrade google-api-python-client google-auth-httpplib2 google-auth-oauthlib
```
